GOLDBERG RESOURCES PRESENTATION 2023

INTRODUCTION LETTER

Goldberg began its operations in 2009 and has stood out for our flexibility and dynamism, which has allowed us to be quick and efficient in generating geological information. We have a small but experienced team in geology, geostatistics, and geophysical interpretation.

The goal of **Goldberg** is to provide customized solutions for each client, helping them maximize the value of their projects. We focus on closely collaborating with clients to understand their specific needs and objectives, offering appropriate and efficient solutions for their projects.

In this presentation, we include the **satisfaction certificate** issued by Admiralty Minerals, with whom we worked on the entire exploration process and achieved excellent results. You can also find **news** publications in media outlets such as the **Mining Magazine of Chile** and reports for the **Australian stock market**.

Finally, we invite you to **contact us** for more information about our **integrated geological exploration services**, and we are willing to answer any questions. We sincerely appreciate your attention and look forward to the opportunity to collaborate with you in the future.

Santiago, 14 de jun. de 23

Estimados Señores.

Me dirijo a ustedes con el propósito de presentarles nuestros servicios de exploración geológica, los cuales se basan en la utilización de tecnología geofísica y métodos geoestadísticos modernos. Nuestra especialización se erfoca principalmente en compañías juniors de exploración que cotizan en el mercado de capitales de Canadá y Australia, así como en inversores privados interesados en agregar valor a sus proyectos y obtener la mejor oferta de venta en el mercado.

En nuestra empresa, nos destacamos por ser flexibles y dinámicos, lo que nos permite ser rápidos y eficientes en la generación de información geológica para nuestros clientes. Contamos con un equipo pequeño, pero experimentado en geología, geoestadística e interpretación geofísica de diversos métodos de exploración. Nuestro objecto es proporcionar soluciones personalizadas para cada uno de nuestros clientes, avudándoles a maximizar el valor de sus provectos.

Nos erifocamos en colaborar estrechamente con nuestros clientes para comprender sus necesidades y objetivos específicos, lo que nos permite ofrecer soluciones adecuadas y eficientes para sus proyectos.

Adjunto a esta carta de presentación, encontrarán un certificado de satisfacción de una de las empresas para la cual desamollamos toda la exploración y con excelentes resultados. Además de noticias publicadas en algunos medios como Revista Minería de Chile v reportes para la bolsa de Australo.

Si desean obtener más información acerca de nuestros servicios geológicos de exploración integrados, no duden en contactamos. Estaremos encantados de responder a cualquier presunta que tengan.

Agradecemos de antemano su atención y esperamos tener la oportunidad de colaborar con ustedes en el futuro.

Atentamente.

Eduardo Guerra

Gerente de Exploraciones

CERTIFICATE OF SATISFACTION

On 2016, Admiralty Minerals issued a certificate of satisfaction with the performance and results obtained by Goldberg Resources, with a special gratitude for the discovery of La Chulula and Simpson.

Admiralty Resources discovers potential IOCG deposit west of Mariposa in Chile

TRX Gold is a new gold producer in resource-rich Tanzania with its...

<u></u> ₩ 🖶

Admiralty Resources (ASX: ADY) looks to have discovered a potential iron oxide copper gold deposit west of its Mariposa Prospect in Chile which could join the targets to the west of Harper South, Mal Pelo and La Vaca.

The discovery was made through a preliminary review of the results of a 3D inversion of a high resolution ground magnetic survey, completed by Quantec Geoscience Chile in March 2011, by external geological consultants, Goldberg Resources.

The 3D inversion of the results of Phase I showed the Mariposa Prospect located in the centre of the survey grid and exhibiting an oval shape with two branches, dipping into the western direction and registering magnetic susceptibility levels higher than 0.9 S.I. units

A Phase II program has now confirmed the continuation of the Mariposa ore body towards the west of the grid, although with levels of magnetic susceptibility ranging from 0.1 to 0.5 S.I. units.

Admiralty Resources' aggressive exploration yields results, La Chulula defined as priority target

Mila Resources making good headway at Kathleen Vallev

平 🕾

Admiralty Resources (ASX: ADY) is on the right path to building its iron ore Resource base along the highly prospective Atacama Fault in the Chilean iron ore belt, with the identification of La Chulula as a high priority target.

Results from a high resolution ground magnetic survey has demonstrated the size potential of La Chulula, with the prospect shown to be 250 metres by 900 metres and to extend to depths of up to 600 metres.

The prospect is located near surface and has returned magnetic susceptibility levels higher than 0.9 S.I. units between 600 metres and surface elevations.

The results of Phase I showed the La Chulula Prospect could extend itself further south of the boundary of the surveyed lines and a 3D inversion of the results showed the potential ore body cut-off.

ADY ANNOUNCEMENT FOR THE ASX

"..Exploration work to date consists of a high-resolution ground magnetic survey the results of which were announced to ASX on 27 June 2012. The survey was commissioned to Quantec Geoscience Chile Limitada ("Quantec") following a field visit inlate 2011 by management and Admiralty's external geological consultant, Goldberg Resources, who was excited at the prospectivity of the district.."

ADY Announcement ASX - 2015

For the guarter ended 30 June 2015

31 July 2015

Admiralty Resources NL (ASX: ADY) is pleased to report its activities for the June 2015 quarter on the Company's mineral projects in Chile and Australia.

Highlights:

Maiden Mineral Resources Estimate of 96 Mt at 24% Fe at La Chulula Admiralty increases total existing resources at cut-off grade of 15% Fe by 36% to 360.7 Mt at Harper South

On 16 April 2015 the Board of Admiralty Resources NL announced that Golder Associates SA ("Golder") has produced a JORC-compliant Mineral Resource estimate for its La Chulula Project, one of the 6 targets of its Harper South District, Chile. The Mineral Resource Estimate quantifies the resources at La Chulula at 96 Mt at 24% Fe for a 15% Fe cut-off in the inferred category. The La Chulula resource estimate is based on the results obtained from the reverse circulation and diamond drilling campaign completed in 2012

Court proceedings with Australis Mining Ltd completed

Admiralty announced to the market on 13 March 2015 that the Supreme Court of Victoria in Melbourne has made a judgment in favour of Admiralty in court proceedings against Australis Mining Limited ("Australis"). Corsair Capital Limited ("Corsair") and Base Resources Ltd ("Base")?

With the consent of the parties, orders were made which have the following effect:-

- Judgment for Admiralty against the defendants for its total claim of US\$ 1,700,000 and interest of US\$419,700,15:
- The two counter-claims against Admiralty were dismissed;

An award of costs in the proceedings to Admiralty solely
